Computer: HTML, CSS, JavaScript(ES6), JQuery, React.js, Node.js, C++, Java, SQL, Bootstrap, UI/UX Design.

Tools: Github, Wordpress, Adobe Dreamweaver, Adobe Photoshop, Adobe XD, Figma.

Languages: English (fluent), Spanish (fluent, native)

WORK EXPERIENCE / PROJECTS

To-Do List Web App | Shellhacks Hackathon

September 2020

- Full stack web application that involved login authentication to access a private to-do list for students.
- My responsibilities included the design of the app as well as the front-end implementation.
- Technologies used HTML, CSS, JavaScript, Node.js and MongoDB.

CollegeWares App | Software Engineering course project

August 2020 – December 2020

- Exposure to software development using Agile methodology to develop an app exclusively for students to interact and rent textbooks and school material among each other in one platform.
- My title was Object Designer where I took charge of ensuring that the interface reflected the functionality assigned to the subsystem. My duties were not limited to creating Use Cases and Object, Class, and Sequence Diagrams.
- Technologies used Java, Swift, JavaScript and PostgreSQL.

LEADERSHIP

Committee Member | **UPE Design** | Miami, FL

January 2021

- Researching and creating workshops for students to learn and improve design techniques with a technological focus.
- About 10% of the UPE student community joined this new program and there was an increase in interest in Front-End Development roles.
- Learned and taught visual and graphic design techniques and tools such as Adobe Photoshop, as well as UI/UX designing and prototyping with Adobe XD and how it can be used within software (web applications and mobile applications).
